

Auto Update Programs

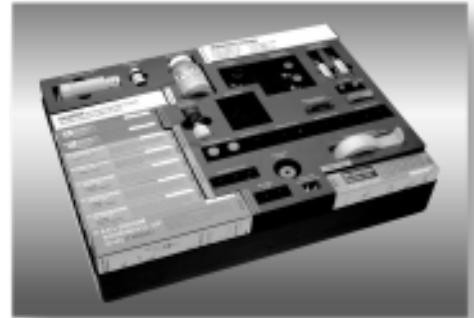

In May 1998, Banyan began providing major U.S. airlines with a Stat Kit similar to the ones pictured here. In addition to refurbishing the Stat Kit when used for in-flight emergencies, the airlines asked us to replace all expired medications and instruments annually. While researching the best refurbishment procedure for the airlines, we discovered a physician demand for the same annual program.

As a result, Banyan now offers a program providing you an automatic annual replacement for every item in your kit that has an expiration date. This will insure that your Stat Kit is fully equipped and ready for any medical emergency requiring your attention. Pricing for the Auto Update is dependant upon the model of Banyan Stat Kit that you have, and is shown below.

Upgrade Your Existing Banyan Stat Kit

As a result of advances in both technology and emergency procedures, Banyan's kit has evolved into the current line of Stat Kit models 700 and 900. Containing a foam tray that snugly cushions your drugs, these kits also allow you the option of purchasing additional ACLS drugs to make your Banyan Stat Kit the most comprehensive kit we have ever offered. As an existing Stat Kit owner, you also have the opportunity to upgrade your current Stat Kit to the new tray and all medications; this upgrade will replace your two drug trays with the one foam tray. Available also is the additional ACLS drug package containing Amiodarone and Vasopressin. Both the Upgrade (**\$485**) and the ACLS Package (**\$80**) may be found on Page 3 of this order form.

Auto Update

1. Fill out your Banyan kit information below
2. Include copy of your DEA Certificate
3. Receive replacement of all items with expiration dates - automatically each year

Fill in this information for Update or Upgrade:

Account Number: _____

Serial Number: _____

Lot Number: _____

(Serial and Lot numbers found inside your case, beneath the handle.)

Effective June 2010, the Auto Update and the Upgrade Package contain one epinephrine auto-injector.

Quarterly Update

Each quarter of the year Banyan sends this Update Notification to every customer as a reminder to check their Banyan Kit for expired medications, and to replace any components that are not current. Follow these steps for kit inspection and to place your order:

1. Check dates and sterility of kit items
2. Fill out this Quarterly Update Notification order form
3. Lock and reseal the case
4. Sign the yellow inspection record
5. Include copy of your DEA Certificate when you mail or fax the order form
