

## Sharps® Recovery System

### Innovative, Cost-Effective Medical Waste Solutions

#### Sharps® Recovery System

Formerly Sharps Disposal By Mail System®

The Sharps® Recovery System is an innovative system pioneered for simplified and environmentally friendly treatment and repurposing of used needles, syringes and other small quantities of medical waste.

A first of its kind, this system completely eliminates landfill use and creates a new resource used in the manufacture of materials for industrial applications.

The Sharps® Recovery System is a government- approved system comprised of a custom designed mailable sharps container, a postage prepaid return-by-mail shipping box, and instructions for use in English and Spanish.

When the sharps collection container is full, the patient, or generator of the medical waste returns the sharps container to its original packaging. The shipping box and the enclosed sharps collection container are then returned to Sharps' treatment facility for repurposing.

Upon receipt, Sharps Compliance documents the return, weight, and destruction of each sharps container. Certification is then available on SharpsTracer,™ Sharps' internet-based tracking program.

Sharps Disposal By Mail System®  
(1 quart, 1 gallon, 2 gallon)

#### Sharps® Advantages

- No landfills required
- Creates a useful raw material
- Reduces costs by as much as 50%
- Is proven, convenient, and easy to use
- Eliminates scheduling and pickup interruptions
- Decreases the carbon footprint – no added fuel charges
- Offers online tracking and proof of destruction confirmation via SharpsTracer™
- Is vertically integrated – manufacturing through disposal
- Complies with applicable regulations
- Does not require a contract

Syringe Capacity Per Container			
Item #	Size	3cc syringes	1cc syringes
10100	1 Quart	20-30	50-70
11000	1 Gallon	95-100	210-230
12000	2 Gallon	250-270	440-460

Also available in multi-pack systems
